PERSONAL PROJECTS

VTU-GPT (02/2024 - 03/2024)

- Developed a Large Language Model (LLM) chatbot using LangChain framework. This chatbot assists university students by answering questions based on uploaded notes (link to project - @https://frontend-next-lime.vercel.app/)

FIO - Food-In-and-Out (03/2024 - 04/2024)

- Built a full-stack food ordering application. Students can conveniently order food through the user interface, and admins can manage orders through a dedicated dashboard (link to project - @https://fio-food-in-and-out.vercel.app/)

BecauseLifeMatters (08/2024 - 09/2024)

- Developed a full-stack web application using HTML, CSS, JavaScript, PHP, and MySQL to facilitate communication and safe navigation during disasters. Won third prize at TechnoTackle Hackathon (link to project - @https://github.com/VinayakNawdhar/BecauseLifeMatters-TechnoTackle).
